

## THE LAWRENCEVILLE SCHOOL

Buildings & Grounds  
Planner / Estimator  
Frederick Montferrat

To whom it may concern,

Max Zeldich and I have worked together on projects since 2013 when I was at Rutgers University New Brunswick Campus. Maximum Fire Escapes was hired to repair a failing fire escape on one of the oldest buildings on College Ave. Max and his crew were the most professional company which I have had dealings with during my 28-year tenure at Rutgers University.

In the summer of 2015 prior to my retirement, Max and I worked together in developing a scope of work with the direction from the Rutgers Historic Architect, Elizabeth Reeves to repair, paint and seal three main gates to the Old Queens Campus in preparation to the 250<sup>th</sup> Anniversary of the University. Needless to say, besides being a high profile undertaking with reviews from the University President's Office, it was one of my most successful with compliments coming from the entire University Community.

Now that I had retired from Rutgers University in July of 2015 and was immediately hired at The Lawrenceville Preparatory School in September of 2015, I have had the opportunity to request Max Zeldich's assistance at TLV School for quotations on a number of "Capital Projects" which are planned for the Spring / Summer of 2017.

I highly recommend Maximum Fire Escapes and Max Zeldich for all your fire escape services and also for any type of project work related to his field.

If you need additional information or clarification, please contact my office.

Sincerely,  
Frederick Montferrat
